

cluster-structures playstructures

A safe, multi functional playstructure system including: The participatory construction and/or assembly of differing configurations The nonspecific functionality of interrelated spaces. A new understanding of geometric three-dimensional reality.

M-4 PLAYGODA

This assembly provides distinct areas for activities, as well as climbing challenges. This includes a picnic area, a slide, a rope feature, and ladder. Numerous attachment points for other items, etc

SIZE M-4
Ages 2-5+

Triple Module (smaller and larger assemblies possible)
Assembled structure approx. 6' x 15'. CPSC schoolyard recommended use area 18'-0" x 27'-0"

Structure Parts List

Available upon request

Assembly Diagram

Available upon request

SPECIFICATIONS:

FINLAND, LATVIAN, or RUSSIAN EXTERIOR BIRCH PLYWOOD
 Allowable stress (psi):
 Extreme Fiber Stress in Bending 3,600
 Compression in Plane of Panel 2,500
 Rolling Shear Stress 100
 Modulus of Elasticity 2,200,000
 EDGE FINISH: Teak oil. SURFACE: 120 GRAM PHENOLIC FILM. Intermittent contact with water allowable.

These structures conform to CPSC Guideline 325 and ASTM 1487-91

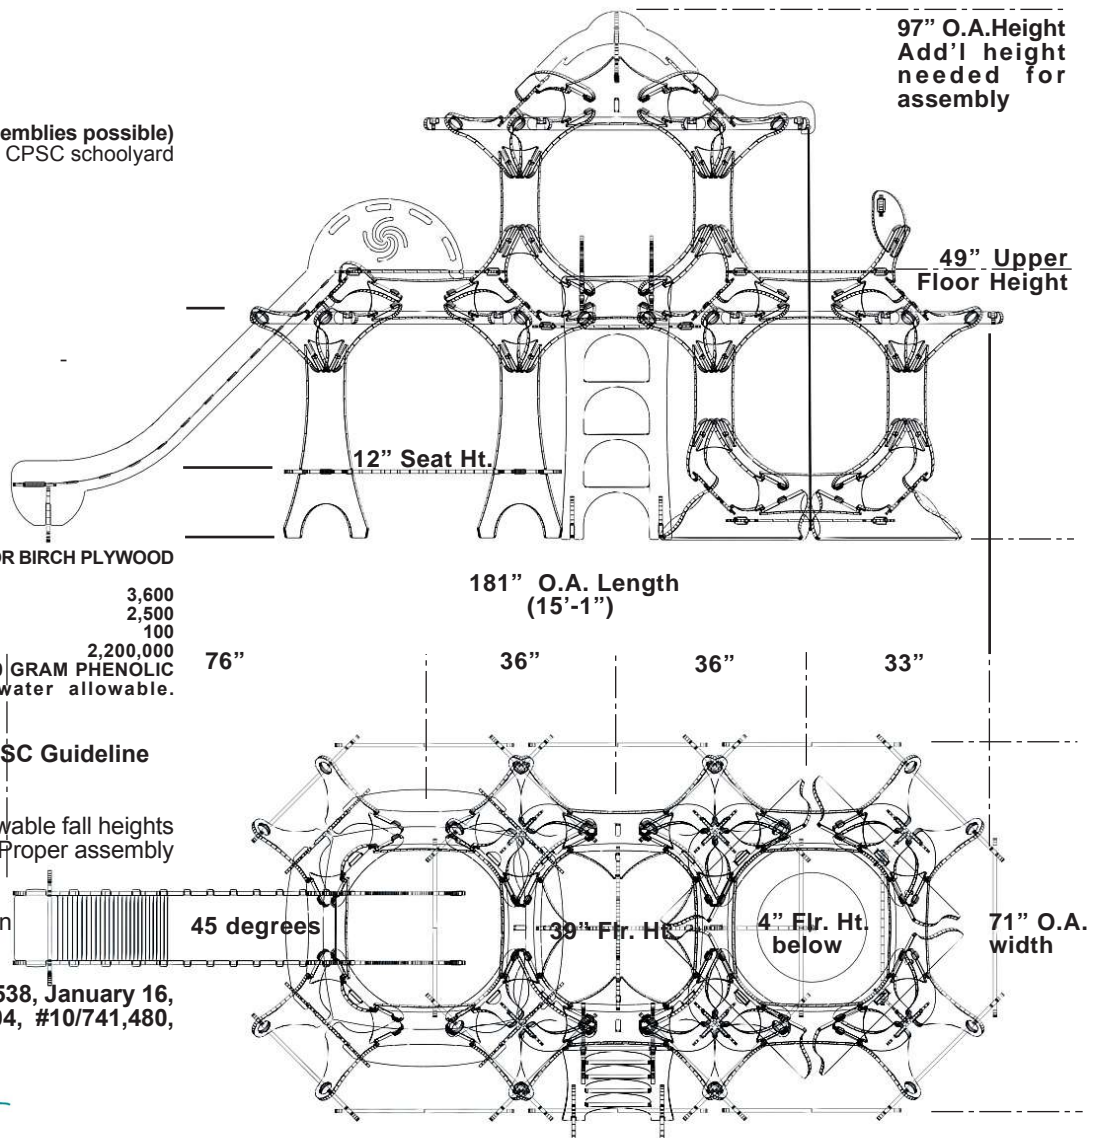

Use only on play surfaces with allowable fall heights consistent with the requirements. Proper assembly required.
